Scotch, Duct, Magnetic... Transparent!

by Thomas Day

The "New" San Francisco Tape Music Center converged for its second installment of the Transparent Tape Music Festival, which stretched over three August days in Berkeley.

The second evening of programming opened with a work from 1959 by John R. Pierce titled *Stochatta*, which was a 37-second tune created at Bell Laboratories as an early experiment in computer synthesized music. Considering the amount of time it probably took to create these few phrases—in the '50s—makes it even more appealing.

Next up was Bay Area composer Cliff Caruthers. It was my first experience with his music, and I must say I was impressed. The premiere (one of three on this evening's program) of his new work *Owl in Daylight* featured field recordings from "Hell's Kitchen" at Lassen Volcanic National Park in California and the Waimaia Falls Bird Sanctuary in Hawaii. It's always great to hear a new composer that excites you.

Feel Something, by Ven Voisey, followed. This piece left me a bit cold. Definitely not up to the same quality of the rest of the night's works. Oh well, I guess composing is sort of a hit-and-miss affair. Perhaps next time I hear this guy's work it will blow me away.

Larry Austin re-created yet another classic work by a gone composer in his reworking of John Cage's *Williams [re]Mix[ed]*, which concluded the program's first half. Anyone familiar with this piece knows its "golden oldie" status in the annals of twentieth century music and its standing as one of the earliest examples of true cut-up music. Basically, Austin took the original recordings Cage made and then tacked on an additional 10 minutes of insipid saxophone playing through a delay and the clichéd use of Cage's voice in the "remix." Personally, I would have preferred hearing something

more obscure that wouldn't be readily available in your local music store. These guys should know better than to program anything with "remix" in the title.

The second half of the concert opened with Max V. Mathews's classic rendition of *Daisy Bell/Bicycle Built for Two* from 1961 (which inspired the HAL 9000 cover from 2001: *A Space Odyssey*), which was also created at Bell Labs. I love this piece; it's kooky yet for the time a complete revelation for computer synthesized sound. The stately Mr. Mathews was in attendance and humbly accepted the crowd's enthusiastic applause.

Max Mathews in 1984

nSFTMC founder Matt Ingalls was next on the bill. I had been looking forward to hearing his newest work, which was the main reason I picked this Saturday event over the other two programs. Ingalls's endeavors into "cut-up" music were taken to a new plateau in this 2'30" shot to the head, *Scherzo: Allegro molto*. His application of "classical" composition formula to such relatively short burst of sound was a feat in itself. My only qualm was in the programming: to have this piece follow Cage's *Williams [re]Mix[ed]* seemed to diminish its impact.

Following was the gorgeous eight-minute work by Kent Jolly, *Holding Pattern* (1998). I'm a hard sell on the meditative stuff, but it truly hit the mark; and perhaps, as a whole, it was the most enjoyable work on the program. Sound was derived from the minimal sources of two bells and a saxophone sample, which left plenty of room for the audience to explore the work's internalized structure.

Gilles Gobeil's *Traces* from 1985 followed. Again this Canadian composer is new to me, and was the sole representative of '80s tape music on the program.

Quick Calendar

Sun 9/1 8.2p \$zero-20 ACME [3192 Adeline, Berk]
Triaxium West plays Anthony Braxton

Tue 9/3 8p \$6 Black Box [1928 Telegraph, Oak]

Sun 9/15 8.2p \$zero-20 ACME
[3192 Adeline, Berk]
MicroFestival of Experimental Vocal Improvisation

Tue 9/17 8p \$6 Black Box [1928 Telegraph, Oak]
Sacrifice Fly & Smith/Lindsay/Josephson Trio

(cont. on page 2)

I truly loved this work, with its mechanical rhythms built from various sound strains. Yes, it sounds dated, yes, it sounds '80s, but that's certainly part of the charm for this listener. Gobeil must be a great composer: his bio consists entirely of a long list of awards he has won; after all, isn't this the yardstick by which we measure a composer's success?

The closing work on this evening's program was the long-awaited world premiere of Joseph Anderson's *Pacific Slope*.

Transparent Tape Festival

(cont. from page 1)

Anderson is one of those young composers seemingly poised on greatness. This magnum opus clocked in at a marathon 25 minutes and was made up of recordings Anderson made of the Pacific Ocean in ambisonic surround sound in Northern California—certainly the heart of this piece. A simple yet elegantly rendered bell sounds throughout the work, which Anderson describes as “an ancient call to transcendence.” This aside, neither of these magnificently recorded sounds are what excited me about the piece. In fact, they paled in comparison to the work’s second section: a riveting rhythmic pulsation that smashed this listener in the ears like a battering ram set on high speed. Anderson definitely approached one of those rare moments of compositional splendor as he wound out of this section—truly amazing stuff. Unfortunately, the remainder of the work did not approach anything comparable. Perhaps the section was so strong that it was impossible for Anderson to outdo it.

I’m looking very much forward to the third Transparent Tape Festival. Best wishes to the nSFTMC for its continuing vigor in bringing this sort of programming to the Bay Area.

On Location at Marin Headlands: Trio Nattoh and special guest Chris Brown

by Tom Djil

A surreptitious but hearty hats off to John Ingle is due for his efforts in stealth-booking a new-music concert series at the inspiring locale of the Marin Headlands Center for the Arts, located out at Fort Barry in the Marin Headlands (part of the Golden Gate National Recreation Area). John and his cohort Emma-Louise Anderson have done a great job presenting an unusual and varied line-up of local artists. And the setting is simply gorgeous—and free of city noises like sirens, trucks, and singing drunks. It’s not that far from either San Francisco or the East Bay, and well worth the drive. Another reason to make the trip: did I mention that John is a gourmet chef, and whips up a sterling dinner before the show in the mess hall (reservations required)?

The Monday August 12 concert of **Trio Nattoh + Chris Brown** was fantastic. The musicians were set at the end of a wonderful old, evocative room with high ceilings, old military-issue fixtures, beautiful cracked, aging patina on the walls and wood floor—an inspiring and resonant space. Chris had a good piano, all

prepared, which he de-prepared during the course of the set. His combination of free-music/post-Cowell/computer-electronics sensibilities makes him one of the most singular and gotta-hear piano players in the world. Shoko Hikage did some exemplary samurai improvising. If you don't watch out, she'll take your head off—she damn near dispatched her kotos to the ghost world. Tim Perkis was funny and irreverent and inscrutable. He has a way of rudely stomping into a sonic space with muddy frequency-modulated feet—but it always seems like just the right thing to do at that moment. And Phil Gelb just played great. This was the first time I'd had a chance to really hear him, and he sounded like the master of timbre, phrasing and attack he clearly is. All of them had huge ears on, listening at a very high level. Only gripe: some pieces too short. Many of them could have been taken quite a ways further. With more time spent together, this trio could rival AMM in close-listening precision and beauty.

Upcoming concerts in the Marin Headlands series:

- September 23: Fred Frith
- October 7: John Shiurba's 5X5
- November 25: David Kwan & Xopher Davidon

THE BLACK BOX SERIES

**Tuesday nights at

The Transbay Creative Music Calendar is a volunteer-produced free monthly journal for non-commercial creative new music in the San Francisco Bay Area. In addition to our comprehensive listing of upcoming events, we publish articles and reviews about local music and the people who create it. We focus on a wide range of modern music, including: experimental, improvised, noise, electronic, free-jazz, outrock, 21st century compositions, and sonic art. Each month, 1000 copies of the transbay are mailed to individuals and hand delivered to over 45 performance venues and public locations throughout the bay area. Pick one up at the next show you attend!

Your kind donations help keep the Transbay alive and growing. Please send checks [payable to "Transbay Music Calendar"] to: Transbay Accounting, 545 Valle Vista #4, Oakland, CA 94610.

Please visit our web site or contact us directly for more information about getting your FREE subscription, submitting content, listing an event, advertising, viewing archives, or volunteering.
